

Meets Specifications

Outstanding work Carlese! 🍌 You have a great project here. I like how you used the dashboard to derive relevant insights about the tragic deaths caused by Malaria in Africa and especially in hard-stricken places like Kenya and the Congo --as you illustrated in insight #2 and #3. Your project shows a great understanding of the data and analytical skills on your part.

Completeness

To explore more visual dashboards, here is a link to Tableau public: <https://public.tableau.com/app/discover>

Congratulations on passing and keep up the great work. Best of luck on your next project! 😊 ☀️

Three insights are reported using one Dashboard.

Each insight has an explanation describing how the insight was reached from the data.

Correctness

For each insight, provide a screenshot that shows what you found in the dashboard.

✔️ Excellent work describing how you arrived at each insight.

While this point may seem small, in real word visualization projects, it is quite important as it achieves two objectives: 1) provides audience with context and understanding of how you arrive at the conclusions, 2) it creates stronger linkage between the written analysis and charts.

Student's conclusions are correct based on the data.

The dashboard was used appropriately to find the information.
